

LAXMI BIRADAR

Bengaluru, Karnataka, India | ✉ laxmirb9901@gmail.com | 📞 +91 9148644803
🔗 linkedin.com/in/laxmi-biradar-32817024b | 🌐 laxmi-portfolio-wheat.vercel.app

Analytical and detail-oriented M.Tech Computer Science student with a strong foundation in Machine Learning, predictive analytics, and full-stack development. Proven experience in designing data-driven systems, engineering scalable web components with React, and building robust predictive frameworks in Python. Skilled at isolating complex data patterns and translating technical workflows into high-impact, operational business intelligence solutions.

EDUCATION

Bangalore Institute of Technology (Autonomous) Bengaluru, India	June 2025 – Expected 2027
<i>Master of Technology (M.Tech) – Computer Science and Engineering; CGPA: 8.30</i>	
KLE College of Engineering and Technology (VTU) Belagavi, India	August 2021 – May 2025
<i>Bachelor of Engineering (B.E.) – Computer Science and Engineering; CGPA: 8.53</i>	
Excellent PU Science College 12th Standard	2021
<i>Percentage: 85.3%</i>	

SKILLS SUMMARY

Languages:	Python, Java, JavaScript, SQL
Frameworks & Libraries:	React.js, Next.js, Scikit-Learn, Pandas, NumPy, Tailwind CSS
Tools & Databases:	MySQL, Firebase, Git, GitHub, VS Code, Jupyter Notebook, MS Excel
Core Competencies:	Machine Learning, Predictive Analytics, Full Stack Development, Deep Learning

WORK EXPERIENCE

Java Full Stack Development Intern JSpiders	February 2025 – May 2025
- Engineered scalable web architectures using Java and advanced JavaScript frameworks, improving frontend rendering speeds. - Collaborated with cross-functional teams to integrate RESTful APIs with relational databases, optimizing query execution times. - Designed responsive, modular UI components using React.js and Tailwind CSS, increasing user engagement metrics during testing.	
Machine Learning Intern Take It Smart (OPC) Pvt. Ltd.	October 2023 – November 2023
- Streamlined data preprocessing pipelines by handling missing values and encoding categorical features, enhancing data quality by 25%. - Developed and evaluated exploratory predictive models utilizing Scikit-Learn to extract actionable insights from raw data assets. - Documented algorithmic workflows and presented data-driven findings to technical supervisors to guide deployment strategies.	

PROJECTS

Hybrid ARIMA-LSTM Forecasting System [Python, TensorFlow, ARIMA]	December 2024 – February 2025
- Developed a hybrid time-series forecasting model combining statistical ARIMA with deep learning LSTM networks via TensorFlow. - Achieved high-accuracy predictive marks by leveraging dual-layered anomaly detection architectures on volatile datasets. - Implemented extensive feature engineering to isolate cyclical trends, minimizing mean absolute error rates by 14%.	
Railway AI Chatbot [Python, NLP, Flask, Machine Learning]	September 2024 – November 2024
- Built and deployed an intelligent conversational agent using Python, Flask, and Natural Language Processing (NLP) frameworks. - Automated retrieval handling for complex transit queries, decreasing user-reported response latency across localized environments. - Managed model integration to ensure conversational integrity and smooth interface delivery for web clients.	

- Constructed an end-to-end classification model using Scikit-Learn to identify fraudulent transactional anomalies.
- Mitigated severe class imbalances using target resampling strategies, improving minority class precision benchmarks.
- Handled structured data pipelines utilizing Pandas and NumPy to isolate core risk vectors efficiently.

CERTIFICATIONS

- **Java OOP Certification** – Mastered object-oriented programming paradigms, structural inheritance, and robust codebase planning models.
- **AI Tools and ChatGPT Workshop** – Acquired advanced competencies in prompt engineering workflow automation and fine-tuning configurations.
- **Excel Certification** – Developed proficiency in dynamic data modeling, advanced lookup arrays, and analytic dashboard structures.
